Product information
Liquid Hand Cleaner

PI 37/09/11/2026

Description
Especially mild, paste-type hand cleaner with moisturizers to protect the skin. Removes even stubborn contamination such as oils, greases, brake abrasion, tar, bitumen, paints, etc. Consists to a large extent of renewable raw materials and contains only natural abrasives made from finely ground corn cob meal, which does not block drain pipes and pipelines. Solvent-free and silicone-free. Dermatologically tested.

Properties
- cleans effectively, thoroughly and gently
- protects and cares for the skin
- economical to use
- versatile
- pleasant scent
- dermatologically tested

Technical data

pH value	4,1 - 5,8 (20°C)
Density at 20 °C	0,80 - 0,95 g/cm³
Viscosity	~ 10 - 30 Pas
Color / appearance	beige
Foaming behavior at 24 °C	good
Odor	Orange
Form	Paste
Flash point	>100 °C
Shelf life in original sealed container	24 months

Areas of application
For cleaning dirty hands.

Comment
Skin tolerance
Extensively dermatologically tested. Made exclusively from the highest-quality raw materials. The complex, synergistic surfactant system gently cleans while the high-quality lipids of natural origin provide excellent replenishment of the skin's natural oils.

Regulatory information
Subject to the German Food and Consumer Goods Act (LMBG), the Cosmetics Ordinance (KVO), and the EC Cosmetics Directives, and therefore not subject to the Chemicals Act or the Hazardous Substances Ordinance. An EC safety data sheet is therefore not required.

Environmental information
Not subject to the German Act on the Environmental

Compatibility of Detergents and Cleaning Agents (WRMG). Nevertheless, it complies with the biodegradability requirements for detergent-based raw materials under this law.

Storage
In accordance with the Cosmetics Ordinance, may be stored for at least 24 months at room temperature in its original sealed container.

Additional skin protection information
One in three people today suffers from allergies. Skin disorders are among the most common occupational diseases and can lead to an inability to work. The high level of exposure to harmful substances in the workplace requires special protective measures. Especially during the winter months, the skin's oil and moisture content is very important due to low humidity levels. The body also produces less skin oil during the winter. As a result, hands can quickly become dry and cracked due to weather conditions, often visible as white, flaky patches on the skin. During this time, the skin requires special care to avoid being left unprotected.
For information on proper skin care, please refer to our Skin Protection Plan (Part no. 6243).

Application
Can be used via a dispenser system (part no. 3335) and wall holder (part no. 3332) from LIQUI MOLY.

Depending on the system (dispenser dosage), the dosage amount of approx. 3 g or 1 ml is sufficient. Thoroughly rub the hand cleaner into dry hands until the dirt dissolves. Then add a little water and wash thoroughly. Finally, rinse your hands well and dry them.

Available pack sizes

3 l Bucket plastic	2831 DA-EN-FI-NO-SV
3 l Bucket plastic	3365 DE-EN-ES-FR-IT-NL-PT
